WORK EXPERIENCE

Software Engineer – SEA Limited (Shopee) (Jakarta, Onsite)

FEB 2025 – Present

- Developed and maintained the **Notification Module** for Shopee's customer-facing web platform, improving notification delivery and engagement at scale. [Tech stack: ReactJS, TypeScript]
- Built and maintained **internal tooling** for notification management workflows, supporting engineering and operations teams.
- Leveraged **AI Agents** to accelerate technical documentation (TD) authoring and drive implementation — producing high-quality, presentable specs with significantly reduced turnaround time.
- Recognized for **strong hands-on coding ability** and effective AI-augmented development practices, consistently delivering clean, scalable frontend solutions.

Senior Software Engineer – Ernst & Young (EY) (Jakarta, Hybrid)

APR 2024 – FEB 2025

- Led a six-member Web Development Team as Acting Lead, overseeing an application used by over **3,000 Toyota dealer** outlets nationally. [Tech stack: ReactJS, TanStack Query]
- Developed the **Toyota Telematics** feature for the mTOYOTA mobile app, now used by **30,000+ active users** on App Store and Google Play. [Tech stack: Flutter]
- Authored comprehensive telematics documentation — functional specifications, technical architecture, and integration guides — ensuring alignment between development, QA, and client teams.

Software Engineer – Samsung Research Indonesia (Jakarta, Onsite)

JUL 2023 – APR 2024

- Contributed to development of display features including **Ambient Mode** (50+ QLED/Neo QLED models) and **Art Mode** (~15 'The Frame' models) for Samsung Smart TV lineup, **deployed internationally**.
- Certified **Samsung Professional Software Engineer**, demonstrating expertise across advanced software development competencies.

Backend Engineer Intern – Traveloka (Jakarta, Onsite)

AUG 2022 – DEC 2022

- Migrated **7 microservices** from Auto Scaling Group EC2 to **AWS ECS**, reducing infrastructure costs by **up to 40%** and improving build speed by **100%**. [Tech stack: AWS, Terraform]
- Contributed to an internal management system for the **International Connectivity** product, serving an estimated **200K–1M monthly customers** across Southeast Asia. [Tech stack: Java Spring Boot, ReactJS, NextJS, PostgreSQL]

EDUCATION

Universitas Indonesia – Bachelor of Computer Science

2019 – 2023

- Graduated with **Exceptional / Extremely Satisfactory** predicate.
- Teaching Assistant for **Computer Networks** (2022).

SKILLS

Programming Languages: TypeScript, JavaScript, Dart, Python, Java, C#, SQL

Frameworks & Libraries: ReactJS, Flutter, Spring Boot (Gradle), Django, Tizen

Databases: PostgreSQL, Azure SQL, Firebase Firestore, MongoDB

DevOps & Tools: AWS, Terraform, Kubernetes, Docker, GitHub Actions, Datadog, RabbitMQ

AI Tooling: AI Agent workflows, LLM-assisted development, technical documentation generation

Languages: English (Fluent), Indonesian (Native)
